Engagement Background

Purpose of Valuation

Veranda Learning Solutions Limited (hereinafter referred to as ("Company or VLSSL") is desirous of arriving Fair Value per Equity share and Share Entitlement Ratio for swap of shares.

The said valuation assignment has been conducted for the purpose of estimating the fair value for further issuance of securities, as per Section 62(1)(c) of the Companies Act, 2013 (as amended) read with Rule 13 of the Companies (Share Capital and Debenture) Rules, 2014, and Regulation 163(3), 164 of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, in accordance with Regulations 166(A) Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) (Amendment) Regulations, 2022

Basis and Premise of Valuation

As per IVS 2020 "Market Value" has been used as the basis of valuation. The Premise of Value has been taken as Highest & Best Use (HABU), which is also understood to be the Current Use, in the present case.

IVS-104 defines "Market Value" as the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.

Market Price Method

A valuer shall consider the traded price observed over a reasonable period while valuing assets which are traded in the active market.

A valuer shall also consider the market where the trading volume of asset is the highest when such asset is traded in more than one active market.

A valuer shall use average price of the asset over a reasonable period. The valuer should consider using weighted average or volume weighted average to reduce the impact of volatility or any one time event in the asset.

Valuation Approaches

Market Approach

The market approach is a method of determining the value of shares based on the quoting price in the respective stock exchange where the shares have been listed.

Market Price Approach Method for valuing shares on Volume weighted average price of M/s VERANDA LEARNING SOLUTIONS LIMITED as observed on NSE over a reasonable period has been used to arrive at the fair value per equity share.

The price computed above is in consonance with Regulation 166A of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) (Amendment) Regulations, 2022 vide Notification No. SEBI/LAD-NRO/GN/2022/63 Dated: 14th January, 2022, which mandates that preferential issue of equity shares which may result in a change in control or allotment or more than five percent, shall confirm to the pricing provisions of preferential issue specified under Regulation 164 of the ICDR Regulations.

In terms of the applicable provisions of SEBI (ICDR) (Amendment) Regulations, 2022, the price at which Equity Shares shall be allotted shall not be less than higher of the following

a. 90 trading days volume weighted average price of the related equity shares quoted on the recognized stock exchange preceding the relevant date. or

b. 10 trading days volume weighted average prices of the related equity shares quoted on a recognized stock exchange preceding the relevant date.

Provided that if the Articles of Association of the issuer provide for a method of determination which results in a floor price higher than that determined under these regulations, then the same shall be considered as the floor price for equity shares to be allotted pursuant to the preferential issue."

In this regard the Articles of Association("AOA") of the Company do not categorically mention about the pricing of preferential issue. The Company, hence, needs a fair valuation report on valuation of equity shares of Company for computation of the price for preferential issue of equity shares to the Allotees, in compliance with the proviso of regulation 164(1) of the SEBI ICDR Regulations.

Workings are given on Pages 11-13.

Valuation Workings-Comparable Company Multiple Method

The income approach provides an indication of value by converting future cash flow to a single current value. Under the income approach, the value of an asset is determined by reference to the value of income, cash flow or cost savings generated by the asset. This approach is appropriate where the income-producing ability of the asset is the critical element affecting the value or reasonable projections of the amount and timing of future income are available for the subject asset.

Valuation Approaches

Cost Approach

The cost approach provides an indication of value using the economic principle that a buyer will pay no more for an asset than the cost to obtain an asset of equal utility, whether by purchase or by construction, unless undue time, inconvenience, risk or other factors are involved. The approach provides an indication of value by calculating the current replacement or reproduction cost of an asset and making deductions for physical deterioration and all other relevant forms of obsolescence. The approach is used where 'cost of substitution' is the economic principle which would be used by market participants to decide the Value of the subject asset.
